SUMMARY

Full-Stack Developer with 3+ years of experience building scalable, multilingual, and responsive web applications. Proficient in React.js, Next.js, Node.js, and MongoDB, with a strong focus on performance optimization, REST API integrations, and crafting immersive 3D experiences with Three.js. Skilled in designing user-centric interfaces and secure authentication systems.

TECHNICAL SKILLS

Languages, Framework: JavaScript, TypeScript, Tailwind CSS, ReactJS, NodeJS, NextJS, MongoDB, SQL, ThreeJS

EXPERIENCES

Full Stack Developer, fotonVR

05/2023 – Present | Patan, Gujarat

- As a Full-Stack Developer at FotonVR, I led the end-to-end development of a scalable, multilingual web platform using **Next.js, Node.js, and MongoDB**.
- I designed and implemented a custom CMS, empowering non-technical users to manage content independently.
- My role also included building **secure, role-based authentication**, optimizing performance with server-side rendering, and ensuring SEO best practices.
- This experience sharpened my skills in architecture design, UI/UX development, and real-world deployment of production-grade systems.

Junior Developer, Squad Technologies

02/2022 – 04/2023 | Ahmedabad, Gujarat

- Integrated **HubSpot APIs** to enhance CRM workflows and automate business processes.
- Developed real-time data sync between HubSpot and internal systems, ensuring accuracy and consistency.
- Resolved API-related issues efficiently, minimizing downtime and maintaining operational stability.
- Gained hands-on experience in **third-party integrations**, debugging, and CRM system optimization.

PROJECTS

FotonVR Website, Frontend: Next.js, React.js | Backend: Node.js, MongoDB, AWS S3 Bucket

- Led the development of FotonVR's dynamic, multilingual web platform to support multi-domain deployment and enhance global reach. The platform empowered non-technical teams to manage educational content effortlessly, while improving performance, accessibility, and SEO.
- Responsibilities: Designed and developed a **custom CMS** enabling non-tech users to create, update, and publish content without writing code. Built a **role-based authentication system** (Admin, Site Admin) with secure access controls and fine-grained permissions. Implemented **dynamic page generation** and **real-time content updates** with server-side rendering for SEO optimization. Architected the backend with **Node.js** and **Express**, managing content, roles, and domain-specific logic. Integrated multilingual support for a seamless experience across different regions. Ensured maintainability and scalability with **modular code structure** and clean API design.

Task Management Module, Frontend: React.js | State Management: React Hooks, Context API

- Led the development of an internal Task Management Module to streamline workflow tracking and boost team productivity at FotonVR. Focused on building a responsive and intuitive UI tailored for daily operations.
- Developed a responsive, user-friendly task dashboard in React.js with features like task creation/editing, project setup, ticket assignment, filtering, table view, and Kanban view.
- Integrated RESTful APIs for task operations and optimized performance using React Hooks and Context API for seamless task management workflows across the platform.

EDUCATION

Bachelor of Computer Engineering,

Gujarat Power Engineering and Research Institute, Mehsana

02/2022

ACHIEVEMENT

- Replaced an outdated WordPress site with a fully dynamic, multi-domain platform and custom CMS, giving the team complete control over content and improving UI/UX significantly.
- Delivered a scalable task management system that boosted team productivity by 30% through intuitive UI, real-time tracking, and Kanban-style workflows.
